Allowable Subject Matter

Claims 12-17 are allowed.

The following is an examiner's statement of reasons for allowance:

1.) Applicant's arguments filed 16-MAR-2004 are generally not persuasive.

The objection and rejection under 35 USC 112 have been withdrawn because applicant's argument clarifies the record regarding the number of steps in claim 12. However, it is noted that the claim could have been interpreted as having additional steps of "forming..." various other limitations. Although the end of preambles are generally indicated by a " : ", colon, applicant's argument has clarified that the preamble ends after the word "comprising".

Applicant's argument that their translation of Zuser et al. is somehow better than the translation filed by Zuser et al. themselves for US Pat. 6,200,663 (ie. Zuser et al. '663 was filed under PCT § 371, which requires an English translation of the disclosure) is amusing, but not persuasive.

2.) Nonetheless, based upon Applicant's argument which clarifies the separation of claimed step, the claim is now understood as comprising separate steps of "coating" and "passing", which overcomes the prior art of record because "thercoated substrate" is formed in a preceding step rather than at the time of "passing" as rendered obvious by the art rejection set forth in the prior Office action.

3.) Furthermore, upon further review, the prior art does not teach or render obvious embossing of a sealing layer wherein the embossment or roughness penetrates less than all the way thru the sealing layer (ie. other layers unaffected by embossing). Applicant's disclosure essentially defining the limitation of how the roughness does not penetrate the sealing at page 5, lines 19-25 of the original specification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
